

## Tap into TGIF: Research & Resources at Your Fingertips

More than 100,000 significant agronomic published and electronic resources are available to STMA professional and student members -- at no additional charge. Since 2004, STMA members have been accessing Michigan State's Turfgrass Information File (TGIF) as a benefit of membership. Purchased separately, an individual subscription to TGIF would cost \$100 per year.

This great monetary value is further complemented by the service – the wealth of information available and how easy it is to retrieve it. In seconds, STMA members can find relevant information to help solve problems by simply clicking on the TGIF link from the member log-in page.

Materials indexed by the Turfgrass Information File include articles from peer reviewed publications, technical reports, research, conference proceedings, trade and professional publications, local professional newsletters, and popular magazines as well as monographs, theses and dissertations, fact sheets and brochures, software, and web documents. TGIF indexes materials from government, college/university, professional organizations, and private publishers and adds approximately 6,000 new materials each year.

Let's look at a quick example of how TGIF can help you with your job.

**Situation:** Your fields have had tremendous use during the summer and you need to justify to your employer why you must limit play for the recovery of the turf.

In the search bar, you simply type *field overuse*. Six entries appear in less than 2 seconds.

<input type="checkbox"/>	<a href="#">Trade Article</a>	Renovation on Overused and Undermaintained Sports Fields	Law, Brian. 1987. <i>Park Maintenance and Grounds Management</i> . August. 40(8): p. 18-19.	<a href="#">MORE</a>	<b>10817</b>

You use information from three of the articles and want to do some further research on managing the recovery of Kentucky bluegrass. You type in *turf recovery Kentucky bluegrass*. That search yields 40 records, which provides you with exactly the data and information you need to validate your plan for a fall field rotation schedule.

TGIF allows you to do a search, such as the process described above, see what is happening in the area of turf research by clicking on *What's New in Turfgrass Research*, or browse by topics. The topics currently listed include:
